#### Pittsburgh, Pennsylvania

Pittsburgh, which lies within 500 miles of nearly half of the U.S. population, has not only been named America’s Most Livable City (The Economist, Forbes) but has also become a hub for innovation in a myriad of fields, from technology to medicine. Pittsburgh is a city that nurtures education and welcomes startups and tech titans alike. The city’s strengths and our education and research concentrations are perfectly aligned to foster meaningful experiences during your graduate-level study and post-graduation as you pursue employment.

- Population: 2.66 Million
- Annual Visitors: 10 Million
- Bridges: 446
- Average Monthly Rent for a Heinz Student: $700-$900
- Best View in America: Mount Washington
- Best Baseball Park: PNC Park
- Best Place for Small Businesses: Entrepreneur Magazine
- Best Place for Entrepreneurship: Pittsburgh, Pennsylvania

---

Carnegie Mellon University’s H. John Heinz III College was founded as the School of Urban and Public Affairs in 1968. The animating vision that led to the school’s founding was to bring a systems analytic approach (inspired by engineering and the mathematical social sciences) to the study of important questions of public interest.

In the years since Heinz College’s founding, we have gone beyond the traditional boundaries of the public interest to deeply explore the impact of information technology on organizations, markets, and societies. We persistently explore the ways in which our educational programs can be more relevant and effective in their curricula, in their delivery models, and in their degree of connection to external partners.

Unlike many graduate schools, our programs are not organized by traditional academic departments. Faculty from our two schools — the School of Public Policy and Management and the School of Information Systems and Management — collaborate on instruction and research, an operating model that leads to innovation in research and a superior educational experience. Our strengths span the applied disciplines of empirical methods and statistics, economics, analytics, information systems and technology, operations research and organizational behavior.

Heinz College offers highly regarded professional master’s degree programs at the intersection of policy, technology, and management. What sets us apart? The core strengths in our curriculum combined with the experiential learning opportunities allow our students to explore their intellectual and professional passions.

Core Strengths
- Heinz College prides itself on laying the foundation for the next generation of leaders in industry and government. Our world-renowned faculty equips our students with the tools needed to effect real change in a global marketplace.

Experiential Learning
- A professional degree should incorporate practical application of skills as a major component of the graduate school experience. Students blend their classroom experience with a wide variety of learning opportunities outside the classroom.

Outcomes
- Employers value the distinct combination of analytical, technical, and management skills that enable our graduates to deploy innovative solutions to complex problems across the global economy.

Research Expertise
- Our interdisciplinary environment creates exciting opportunities for collaboration and has resulted in an international reputation for high-quality research.

Classes include:
- Economics & Finance
- Statistics & Data Analytics
- Applied Technology
- Organizational Management
- Professional Communications
- Predictive Modeling
- Policy & Regulation

Opportunities include:
- Capstone Projects
- Case Competitions
- Leadership Development
- Summer Internships
- Academic Year Internships
- Diversity Theatre
- Leadership Trip to Gettysburg
- International Crisis Negotiation Exercise

Employers value the distinct combination of analytical, technical, and management skills that enable our graduates to deploy innovative solutions to complex problems across the global economy.
