Each circle represents a county. Color shows Democratic share of votes. Size shows total votes (regardless of party). An analysis by Rondell Jordan (MSPPM-DC) for the Center for Economic Development, School of Public Policy and Management, Heinz College. Note: colors indicate intensity of shares, not threshold of victory. In 2016, for example, Clinton "won" Monroe, Bucks, Dauphin, and Centre counties, but with less than 50% of the vote. Data retrieved directly from the PA Department of State.
